Profile

I am passionate about acquiring knowledge in the areas of back and front-end web developing. I work tirelessly to exceed every expectation of any task I set my mind on. My objective is to not only be a skillful developer but to be fully knowledgeable in areas such as web development and other IT related fields. I want to be in a working environment where my creativity and versatility can be challenged and utilized to bring forth growth in both the company and me.

Education

01/2022 – present
Middelburg, South Africa

Computer Science | Diploma Tshwane University of Technology

I am deeply passionate about my diploma in Computer Science, as it perfectly blends my love for technology and problem-solving. From writing my first line of code, I was captivated and astonished by the limitless possibilities of programming. I am committed to applying my knowledge to real-world problems and making a tangible impact through technology.

Skills

Java
